

Ref: A21761 SUPERTOX INSECT FOGGER CONCENTRATED U2

Insecticide fogger for crawling and flying insects.

- ✓ One-shot
- ✓ Persistent action

It is strongly advised to place the cap under the product before use to best protect the plastic.

APPLICATION

Effective against: houseflies, mosquitoes, wasps, moths, fleas, ants, cockroaches and stored product insects, including toothed grain beetles and grain weevils.

One 11g fogger treats 400m³ against flying insects and 100m³ against fleas and 25 m³ for bugs, ants and cockroaches.

Do not use on grain or in empty grain storage.

RECOMMENDED FOR

- Local authorities
- Hospitals
- Machine rooms
- Attics, cellars

INSTRUCTIONS FOR USE

For best results, fumigate in the late afternoon and leave the house or late afternoon and leave the house or building empty for at least building empty for at least 2 hours.

Determine the number of fumigants required for the room to be treated. Massive infestations may require more than one more than one application.

Place the fumigant(s) spaced apart on the floor on a heat-resistant surface. Close all windows, interior doors and closets.

Before using, remove people and animals from the room. Open the smoke generator(s) and place the cap under the product. Open the smoke generator(s) and light the

wick of the generator furthest from the exit first, then light the next smoke generator closer to the exit. Leave the room and close the door.

Leave for a minimum of 2 hours, preferably overnight. Ventilate well before returning to the room.

Deformations on the plastic may occur.

For severe infestations, fumigate 3 times, 5 to 7 days apart.
