

Ref.: A22130 EXTRA POWERFUL NEST GLUE FOR HORNETS AND WASPS 500ML KING

Long-range trap for nests and flying insects around nests.

- ✓ Long-lasting effect
- ✓ Super strong diffuser
- ✓ 1 aerosol = 3 nests

APPLICATION

Alternative treatment to insecticides. This aerosol delivers an extremely adhesive product, which plugs entrances to insect nests such as wasps and hornets or can gum up an insect in mid air. Insects are glued whilst returning to their nest.

The long-lasting effect means late-coming insects become gummed up.

Efficiency has been tested and proven on hornets' nests. The special long-range jet allows substantial spray to be delivered at a distance up to 4 metres away. Its high-powered nozzle ensures correct application.

INSTRUCTIONS FOR USE

Wear gloves. Shake can well before use.

- **On individual insects around nests:**

Spray in short bursts of 1 to 2 seconds on the insect. Avoid facing the wind.

- **On nests:**

Preferably use at night when the insects have returned to their nest.

Hold 2 to 3 metres away from the nest.

Spray until the entire nest is covered. Ensure that the entrances to the nest are well plugged.

3 to 5 seconds of spray is enough to cover a hornets' nest measuring 35 cm in diameter.

PRECAUTIONS FOR USE

Never use indoors.

To remove glue from surfaces use a glue spray cleaner.

To remove from skin, apply a little vegetable oil to sticky areas and wash hands with soap.

PACKAGING

Presentation: Aerosol can

Pack size: Carton of 12

Tin can Diameter: 65 mm/Height: 195 mm

Nominal volume: 650 ml/Net volume: 500 ml.

Pallet size: 1,080 units – 90 cartons

REGULATIONS

FOR INDIVIDUAL AND PROFESSIONAL USE

Dangerous. Follow precautions for use.

Refer to the safety data sheet (SDS). Available on request.

Our data sheets are prepared with current knowledge and subject to modifications. Photo non-binding.
