	Nymphs, t0 and t+4 weeks	15 min	100%	Textile surface treatment
Human lice <i>Pediculus humanus capitis</i>	Adults, volume 0	-	80% in 18 hours	Textile surface treatment
Scabies mite <i>Sarcoptes scabiei</i>	Adults, volume 0	40 min	100%	Textile surface treatment

● Application:

Very effective acaricidal insecticide. Active on parasites such as human lice, dust mites, ticks (adults and nymphs), fleas (adults, larvae, eggs), scabies sarcoptes present in your home.

Immediate effectiveness and up to 4 weeks after application depending on the targeted insects.

Used for the treatment of textile surfaces such as fabrics, bed surrounds, carpets, etc. Complementary treatment of allergies to household mites (asthma, rhinitis, conjunctivitis) and infestations by lice to avoid frequent phenomena of human recontamination through clothing or bedding. Does not stain or damage treated surfaces

● Directions for use:

Dose: 30 seconds per m² (i.e. 37.5g/m²).

Spray 30cm from the surface to be treated.

Let dry completely for at least 1 hour.

Ventilate the room for 1 hour.

Vacuum to eliminate allergens.

Yield: 1 aerosol of 500mL can treat up to 8 m²

Frequency of use: 1 application per month.

PRECAUTION OF USE

Keep cats off treated surfaces.

This biocidal product contains insecticidal substances which may cause severe adverse effects in cats.

Do a test beforehand on a very white fabric.
